

EnzyTag

Traceless Ligation

EnzyTag BV is an innovative partner to the pharmaceutical and biotechnology industries. The company is located in Nuth, close to the Brightlands Chemelot R&D campus in Geleen, The Netherlands.

EnzyTag has an exclusive license to proprietary peptidase technology for developing manufacturing processes for peptide-based new chemical entities (NCEs) and (bio)conjugates. The technology provides traceless and completely stereo- and regioselective ligation of peptides to other peptides, peptide-linked payloads and proteins. This technology has set a new standard in peptide research, development and manufacturing.

To further strengthen our R&D team we are looking for a talented

Bio-organic Chemist (MSc / BSc)

As bio-organic chemist you are working as part of a multi-disciplinary project team on

1. scalable synthetic routes for peptide products currently in clinical trials,
2. the development of new enzymatic peptide coupling technologies.

You are expected to execute the experimental lab work including analysis of the samples. In addition, you will perform literature studies and write project updates and reports.

Requirements:

- MSc / BSc degree in organic chemistry and/or applied biocatalysis. Graduates are also invited to apply on this vacancy.
- Experience with peptide chemistry is an advantage.
- You have strong communication skills, both verbally and in writing. You are fluent in English.
- You like working in a professional environment with strict customer deadlines.
- Vigorous can-do mentality and motivation to succeed in a dynamic and highly collaborative start-up environment.

EnzyTag is a rapidly growing company and offers a versatile function in an inspiring work environment with committed and motivated colleagues. The candidate gets lots of opportunities to develop (peptide) organic chemistry and analytical research skills. The area of expertise offers a cutting-edge combination of bio-organic chemistry, biocatalysis, computational chemistry and fermentation. Team-spirit and entrepreneurship are important values in our company.
